

ALDERWOOD WATER & WASTEWATER DISTRICT

2022 Water Hydrant Bid

ADDENDUM NO. 1

January 14, 2022

Below are clarifications and answers to received questions regarding the 2022 Water Hydrant Bid.

1. **Due to current disruption in the supply chain would there be any leniency to the requirement to guarantee hydrants will be delivered as ordered within 10 working days of receipt of order requirement?**
 - a. The District would expect that a vendor would have at least 1 hydrant in each size available for delivery within 10 working days in case we had an emergency need for a hydrant. This could be a direct order from the supplier or from the bidder's warehouse. Above the one-hydrant availability, the District would have leniency in delivery lead times with regards to the current disruption in supply chain.
